Massachusetts Preliminary 1992 Crime Statistics

Data released today indicated that all Part I crimes decreased 6.6% between 1991 and 1992, while Violent Crimes increased by 1.4% and Property Crimes declined by 8.1% These figures are based on data voluntarily submitted by police agencies throughout the Commonwealth. Data is included only for agencies which submitted at least 3 months of data in both 1991 and 1992.

The Massachusetts figures can be compared to the FBI's national preliminary annual report, which showed a 4% decline for all Part I crime, with an unchanged Violent Crime rate (0%) and a 4% decline in Property Crimes.

The percentage change in the Part I crimes for the US and Massachusetts are as follows:

	Total	Violent	Property	Murder	Rape	Robbery	Aggr. Assault	Burglary	Larceny	Motor Veh Theft
US	-4	0	-4	-6	+2	-3	+2	-6	-4	-2
Mass	-6.6	+1.4	-8	-27	+13	-4	+3	-8	-7	-10

A more comprehensive annual report will be released by the Crime Reporting Unit of the Criminal Information Section in the Fall of 1993.

Note:

Due the consolidation of the Metropolitan Police Department with the Massachusetts State Police in July, 1991, the 1991-1992 crime stats for the consolidated agency are not comparable. Data for these agencies will be published in the annual crime report, scheduled to be released in the Fall, 1993.

The data in this report deals ONLY with departments which reported at least 3 months of crime data in both 1991 and 1992. The reports are composed of actual and estimated crime data as voluntarily reported by police departments throughout the Commonwealth.

The "Percent Change" figures should be used cautiously with police agencies which report small numbers of offenses. An increase (or decease) of only 1 or 2 crimes may translate to a large percent change figure.

Notes on table: An "*" appears in a data column for 1992 if the agency did not participate in the UCR program for that year; an "*" appears in the column labeled "% Diff" if a percentage difference cannot be calculated.

Due to the consolidation of State, Metropolitan, and Capitol Police, it is not strictly possible to compare data from prior years with that for 1993.

A number of departments are appearing in this table for the first time, due either to their ability to now supply UCR data to the Crime Reporting Unit, or due to our ability to now process their NIBRS data submissions. It is possible to make year-to-year comparisons of data ONLY for agencies which submitted data in both years. As a result, we have presented both "UNADJUSTED" and "ADJUSTED" data figures. For the purpose of calculating the percentage change from one year to the next, only the "ADJUSTED" figures can be used, as this data only includes departments which consistently reported crime data.

As always, these data are presented as PRELIMINARY 1993 DATA -- subject to change and/or correction. The data should be viewed cautiously -- many smaller police agencies may show large percentage increases or decreases due to the small number of offenses reported. In addition, other factors may influence the reported number of offenses.

Notes on table: An "*" appears in a data column for 1992 if the agency did not participate in the UCR program for that year; an "*" appears in the column labeled "% Diff" if a percentage difference cannot be calculated.

Due to the consolidation of State, Metropolitan, and Capitol Police, it is not strictly possible to compare data from prior years with that for 1993.

The Springfield and Worcester Police Departments have informed us that they did not collect Aggravated Assault data in accordance with UCR standards and definitions. They have requested that this data not be reported, and therefore it has been deleted from this report.

A number of departments are appearing in this table for the first time, due either to their ability to now supply UCR data to the Crime Reporting Unit, or due to our ability to now process their NIBRS data submissions. It is possible to make year-to-year comparisons of data ONLY for agencies which submitted data in both years. As a result, we have presented both "UNADJUSTED" and "ADJUSTED" data figures. For the purpose of calculating the percentage change from one year to the next, only the "ADJUSTED" figures can be used, as this data only includes departments which consistently reported crime data.

As always, these data are presented as PRELIMINARY 1993 DATA -- subject to change and/or correction. The data should be viewed cautiously -- many smaller police agencies may show large percentage increases or decreases due to the small number of offenses reported. In addition, other factors may influence the reported number of offenses.

Notes on table: An "*" appears in a data column for 1992 if the agency did not participate in the UCR program for that year; an "*" appears in the column labeled "% Diff" if a percentage difference cannot be calculated.

Due to the consolidation of State, Metropolitan, and Capitol Police, it is not strictly possible to compare data from prior years with that for 1993.

A number of departments are appearing in this table for the first time, due either to their ability to now supply UCR data to the Crime Reporting Unit, or due to our ability to now process their NIBRS data submissions. It is possible to make year-to-year comparisons of data ONLY for agencies which submitted data in both years. As a result, we have presented both "UNADJUSTED" and "ADJUSTED" data figures. For the purpose of calculating the percentage change from one year to the next, only the "ADJUSTED" figures can be used, as this data only includes departments which consistently reported crime data.

As always, these data are presented as PRELIMINARY 1993 DATA -- subject to change and/or correction. The data should be viewed cautiously -- many smaller police agencies may show large percentage increases or decreases due to the small number of offenses reported. In addition, other factors may influence the reported number of offenses.

Only police agencies which submitted at least 3 months of data for both 1994 and 1995 are included in this table. Data in this table for 1995 are preliminary and subject to correction.

Endnotes:

1. Burglary data from the Avon Police Department was not collected in accordance with UCR standards for 1995. Comparisons with 1994 data should not be made.
2. The Franklin Police Department made significant changes in their reporting practices between 1994 and 1995. As a result, year to year comparisons of the data should not be made.
3. Aggravated Assault data from the Natick Police Department was not collected in accordance with UCR standards for 1994. Comparisons with 1995 data should not be made.

The Massachusetts State Police has been collecting crime data in a new format from nearly 80 police departments. This new system of data collection is called the National Incident Based Reporting system ("NIBRS"). NIBRS reporting agencies report significantly more information about a larger number of crimes than does the older UCR system.

In the following three tables, some NIBRS data is presented for 1995. It should be noted that some agencies listed in Table #1 did not report data for the full year. Table #2 lists all of the NIBRS offense categories, and the number of offenses cleared by arrest. Table #3 lists the percentage of cases in which a victim was related to an offender as either a domestic partner or family member, other person known to the victim, or stranger/unknown for crimes of violence. The data in Table 3 is presented separately for male and female victims.

These tables present only a very small sample of the type of data analysis which is possible using NIBRS data. Information is collected about other crime factors such as location and time of offense, drug or alcohol involvement, injury to victim and weapon use.

In this table, the victim's relationship to the offender is defined as follows:

"Family/domestic" include domestic partners or ex-partners, immediate family members, and other related persons

"Other Known" includes acquaintances, friends, neighbors, employers, employees, and other persons known to the victim

"Rel. unknown/stranger" include cases where an offender was identified but unknown to the victim.
